STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State/Territory: Mississippi

Method for Determining Cost Effectiveness of Caring for
Certain Disabled Children At Home

The method for determining cost effectiveness is through comparison of the financial data compiled on the costs of the "disabled children at home" category to the nursing facility services costs as reflected and substantiated through MAM reports from the MARS reporting system. Cost effectiveness does exist as there is no vendor payment for nursing facility services for these children, and the children are eligible for the medical services that all other Medicaid-eligible children receive regardless of their category of eligibility.

Financial data for each child will be reviewed and compared periodically by utilizing the cost-effectiveness plan described above. Since all eligible children under age 21 are entitled to expanded EPSDT services as mandated in OBRA '89, prior approvals are secured for those services which are in addition to the regular Medicaid program services.
